## Summary

I am a Senior Software Engineer with heavy experience in Ruby on Rails. I've also been developing my leadership skills and always looking for opportunities to apply those skills in either a management or team lead role.

Specialties:

Ruby / Ruby on Rails

Continuous / professional development

Adaptability and quick learning

## Experience

### Senior Software Engineer

NRC Health

Apr 2021 - Present (1 year 8 months +)

I work on the PatientWisdom team at NRC Health. Our digital platforms improve health and care by listening to patients, providers, and community members – individually and at scale. We drive value by turning real-world perspectives into actionable insights to improve the experience and delivery of care.

My role is to help design, build, and test the Ruby on Rails and React platforms that make this possible. I also spend time mentoring and supporting the rest of the development team.

### Salesforce Developer

Cornell University

Dec 2018 - Apr 2021 (2 years 5 months)

I help design and build software systems on the Salesforce platform in order to contribute to the University's internal Salesforce applications. I also contribute to web development and desktop development outside the Salesforce platform in Ruby on Rails, JavaScript and C#.NET.

### Senior Developer

TEKsystems

May 2017 - Dec 2018 (1 year 8 months)

I worked as a contract employee for a single long term contract at Cornell University. In that role I was responsible for designing, building and maintaining web software systems in Ruby on Rails and PHP, as well as integrating with existing data stores such as Salesforce applications and custom APIs.

### Software Engineer

Rosie, an Instacart Company

Jan 2016 - May 2017 (1 year 5 months)

I'm part of the team building the back end for Rosie, a grocery ordering and delivery app. I'm responsible for helping plan, build and test the Ruby on Rails project that supports both our front end applications and business facing applications.

I've also been involved in internal professional development, planning and helping build a micro-service oriented architecture, and promoting a culture of mutual respect, challenging conventions, and holding ourselves to high standards.

## Software Engineer

Terakeet

Feb 2014 - Jan 2016 (2 years)

I help maintain and extend a legacy Ruby on Rails code base used by the entire company to achieve our business goals. I also help plan and build new systems with Ruby on Rails, other Ruby frameworks and Python 3. These projects utilize technologies such as MongoDB, HDF5 and Redis. I'm also involved in building and maintaining our unit testing suite in RSpec and system monitoring tools like New Relic, Airbrake and DataDog to make sure the system is consistently running well and that the team is alerted to any issues in an appropriate time frame..

## Independent Web Developer

Independent

Mar 2013 - Feb 2014 (1 year)

I performed custom web development consulting work for a variety of clients, mostly using CakePHP to build new systems or extend existing properties. I also had the opportunity to explore Twilio and worked on a Java applet to provide an easy interface for Javascript to interact with receipt printers and raw serial ports.

## IT Specialist

Midstate Spring, Inc.

Mar 2012 - Feb 2013 (1 year)

I managed and maintained a hybrid Mac/Windows environment including a Terminal Services machine and 20+ Mac minis. I was also responsible for custom web development for internal portals using CakePHP and jQuery.

## Founder

zen.0

Oct 2010 - Mar 2012 (1 year 6 months)

I operated a consulting business providing custom web development services. My projects were mostly CMS sites based on WordPress or CMS Made Simple.

## Web Developer

Kishmish, Inc.

Jun 2009 - Oct 2010 (1 year 5 months)

I did mostly front end HTML/CSS and JavaScript development for Kishmish, with an emphasis on clean markup, adherence to standards and strong SEO.

## **IT Consultant**

Self-Employed

Mar 2009 - Aug 2009 (6 months)

I was an independent IT consultant doing development and design work on the web and desktop platforms.

## **IT Specialist**

Cooperative Federal

Aug 2007 - Feb 2009 (1 year 7 months)

I managed a network of approximately 25 Windows machines across three remote locations for a local financial institution. I also developed a custom reporting solution using a number of technologies to interface with our core data processing system including custom PHP, OpenReports and Tomcat Java Application Server.

## **IT Technician**

MMRI

2005 - 2006 (2 years)

I was responsible for basic troubleshooting and hardware replacements on the IT infrastructure. I also prepared new hardware for deployment and managed user accounts.

## **Education**

### **Chittenango High School**

New York Regents with Honors, General Studies focusing on Math and Science

1998 - 2002

## **Skills**

Ruby on Rails • Ruby • Web Development • Databases • JavaScript • WordPress • MySQL • Ubuntu • Website Development • HTML
